

This election illustrates why it is incumbent upon corporations like Sinclair to carefully assess the public interest as opposed to their own when it comes to choosing their broadcasting fare.

Government by corporation is the danger we face when they control increasingly larger and larger portions of the media. A free press means free communication. A biased press means frustrated communication and a frustrated electorate.

Organizations like the FCC are critical to maintaining government by the people, not the bottom line!! Attacks in the name of news are not justified. The closer to election day they occur, the more damaging they can be. Please address this problem for the sake of all citizens!!
